(LISTED BELOW)25X DATE OF
INFO. October 1952SUPPLEMENT TO
REPORT NO.

THIS IS UNEVALUATED INFORMATION

According to the decree of the Ministry of Mining and Smelting, Maxhuette, Unterwellenborn, was to produce 25,000 metric tons of Siemens-Martin rolled steel in 1952. According to the amounts of material already delivered and the opinions of the management of the works, however, only 13,000 tons can be produced. Of this amount only about 5,000 tons will be of SM quality. The remainder is Thomas steel, which is not always usable for technical purposes in which SM steel has been specified.
